Afternoon Tea

This afternoon tea invites guests to experience a composición
of perfume and flavor under the concept of

“Tasting Nature’s Original Landscapes and Creating Rhythm Through Scent.”

Inspired by the vast winds that sweep across the South American Pampas wetlands, the slow ripening of
fruit beneath the sun, and the layered memories of earth, smoke, and botanical life,
each creation expresses these landscapes through both taste and scent.

Every menu item has been thoughtfully designed with aromatic elements that correspond to
and complement its flavors, creating a multidimensional sensory experience.
